OUWB Alternate Spring Break

With the Foundation For International Medical Relief of Children (FIMRC) in Limon, Nicaragua

OUWB medical students were able to gain a variety of healthcare experiences including working with nurses of the local health post to visit schools and go house to house to vaccinate children as part of Nicaragua's March vaccination campaign. As well, children were given anti-parasite medication and vitamin A.

They also checked in patients at FIMRC's bi-weekly clinic visits by a pediatrician and observe the pediatrician seeing patients.
