Fall 2019 Notes and Special Topic Course Descriptions:

For all other course descriptions, please visit the University Catalog link at: <https://www.oakland.edu/grad>

Note 1:

This course will fulfill the information technology MBA elective requirement.

Note 2:

This course will fulfill the MBA international elective requirement.

Note 3:

These courses are designed for the MAcc (Masters of Accounting) student. MBA students with an accounting background may take these courses with permission from Donna Free, Faculty Coordinator, Master of Accounting. The 5000 level courses will fulfill the 6000 level MBA elective requirements. For MBA students, ACC 6300 will fulfill an open elective; it will not fulfill any 6000 level accounting requirements. If you are not a MAcc student and wish to complete any of these courses contact Donna Free at free@oakland.edu for permission.

Note 4:

All students must complete a capstone course - ACC 6995 for MAcc; MGT 5350 [or MGT 5360] for MBA; and MIS 6940 for MSITM. The capstone course should be taken near the end of your program. Advisor permission is required to register for these courses. To register for MGT 5350 or MIS 6940 call Graduate Business Programs at (248) 370-3287; to register for ACC 6995 email Donna Free at free@oakland.edu.

Note 5:

MIS 6900 - IT Based Innovation (CRN 45242): In today's changing technology landscape, firms need to co-create value with customers for competitive differentiation by developing innovative IT enabled (or digital) services. To support these evolving services, businesses need agility to align their business architecture (comprising of various strategies used to address business objectives and commercial viability) with the service system architecture (agile IT architecture used to design and implement these services). This course uses a 10 step "Digital Leadership" framework to connect a firm's innovation with technology and strategy. The course asks students to develop an innovative digital service to address a consumer (internal or external) need and develop a business and service system architecture using the framework.

Note 6:

MIS 6900 - ST: Competing in a Connected World (42404): This course focuses on defining a backdrop for the emerging world in which engineers and business leaders will compete. Experts predict that by 2020 the world will have 50 Billion devices that are connected to the internet. These will include already connected consumer electronics, but rapidly expand to include almost every product imaginable (appliances, cars, even mice traps). As these once closed systems are connected, mega systems will be created generating incredible amounts of data, creating entirely new user experiences, and changing customer expectations. This course intends on helping students recognize these changes, and determine how they can best apply their skills to capitalize on this changing world.

Note 7:

MIS 6900 - ST: Deep Learning and Text Analytics (44606): This course provides an introduction to deep learning and text analytics. It covers topics such as basic neural networks, convolutional and recurrent neural networks, deep unsupervised and reinforcement learning. It also introduces text analytics and discusses natural language processing, topic extraction from text, content management and sentiment analysis.

Note 8:

ECN 6900 - ST: Global Macro Economics (45584): This course presents information on the impact of US policy on the global economy. Students will review macroeconomics concentrating on both the impact of monetary and fiscal policy. The bridge between the US and the global economy is international trade and exchange rates. The Theory of Comparative Advantage, the impact of trade and trade barriers as well as how exchange rates are determined will then be explained. Current US policy debates will be discussed and how each impacts both the US and the global economy. Examples of these policies are immigration, tariffs, the 2017 tax cut, the Affordable Care Act, and the Federal Reserve decisions regarding interest rates and monetary policy. *Prerequisite:* Principles of Macroeconomics

OTHER IMPORTANT INFORMATION:

A graduate student, with the approval of departmental adviser, may use a maximum of 12 credits of 4000-4999 courses taken at Oakland University toward a graduate degree (taken from Graduate catalog).

Waitlisting Through Sail

The same registration requirements apply for waitlisting (e.g. prerequisites, restrictions etc.)

After priority registration waitlist is first-come, first-served

Restrictions allowed for waitlisting (not registration)

Duplicate section

Time conflict

Students are automatically notified when a seat becomes available through their OU email by waitlist@oakland.edu

Students have 24 hours to register for a waitlisted course

Student may choose to do nothing, and then the next student on the waitlist will be notified after 24 hours expires

If a student changes their mind after their 24 hours expires, they could add themselves back to the bottom of waitlist

Waitlisting available through first week of late registration

Second week of late registration waitlisting will not be available

Closed course overrides will be required in SAIL

GRADUATION

When you are near completing your degree requirements, you must complete the Application for Degree form. This application is completed online in SAIL. For more information see Apply for Graduation website: oakland.edu/graduate
