6:00 – 9:00 Dinner

Roundtable Remarks: Perspectives on the Future of Research on Violence and the Evolution of Violence (5 minutes per panelist)

Department of Psychology
Oakland University
Announces a Program of Graduate Education in Psychology leading to the degrees of

M.S. in Psychology
Ph.D. in Psychology

Beginning in the Fall, 2012

The program leading to these graduate degrees will provide students with the knowledge, skills, and experiences necessary to become successful consumers and producers of psychological science. Psychology is a broad discipline that interfaces with the biological and social sciences and our programs are organized around two concentrations that together encapsulate the breadth of psychological science: (1) Biological and Basic Processes and (2) Social and Behavioral Processes. These concentrations represent two broad areas that focus on phenomena from different orientations in moderately overlapping but distinguishable content areas.

Students seeking the M.S. degree will be broadly exposed to the content and methods in both concentrations. Students seeking the Ph.D. degree will have similar broad exposure to both concentrations which will be extended by an intensive inquiry specialized in one concentration. As a result, students in the Ph.D. degree program will apply for admission in one concentration, whereas students in the MS degree program will be required to distribute their course work across these concentrations.

For additional information concerning these programs, please visit http://www.oakland.edu/psychology/grad/
