Master of Arts in Communication, Culture and Technology (CCT)

Program Path:

IDS Type: Unrestricted IDS

Program Type: Foundational IDS Program

Description: The way we communicate is changing dramatically. To fully understand the world we live in, we must understand the role that technology plays in our lives – from how we shop to how we form our identities. The Communication, Culture & Technology Program (CCT) explores how we use media and technology to communicate from social, economic, political, and cultural perspectives. This interdisciplinary study of communication, culture and technology is vital to achieving success in today’s changing world, and employers demand the skills that our students develop during their study in CCT. (From website.)
