

License Type	License Purchase		License Use Rights	Authorized End User	Supported Operating Systems	Installation	Concurrent Use - you can install and run the license on multiple computers at the same time	Administrative/Non Academic Use	Graduate Assistant
	Term (Annual Lease)	Perpetual (Initial Purchase w/Ongoing Maintenance Fee)							
Standard Desktop License	\$2,250 for SPSS Base License Modules: Advanced and Regression \$1,249 each	Approximately \$600/yr per per named user Estimate 20% of license cost per user for ongoing maintenance fees- approximately \$120 each user	1 License per Computer	Authorized User for the Academic Institution	When ordering state the operating system you use so that you will receive the proper quote: Windows, Mac, Linux. A separate license must be purchased for each operating system; For example, if you have both a Mac and a Windows computer you will be required to purchase 2 licenses	An Authorized User License is created for a specific computer	Yes	Yes	Yes
Faculty Pack	\$255/Yr	N/A	Single-user licenses for educators to integrate statistics and quantitative methodology into their course curricula	A Faculty Member , which is an individual who actively teaches a course utilizing IBM SPSS Programs for a degree granting institution, for classroom teaching and non-commercial academic research. Use of the Program is restricted to use by a Faculty Member for teaching and Non-commercial academic research means research by a Faculty Member where (i) the results of such research are not intended primarily for the benefit of a third party; (ii) such results are made available to anyone without restriction on use, copying or further distribution; and (iii) any copy of any such result is furnished for no more than the cost of reproduction and shipping.	When ordering state the operating system you use so that you will receive the proper quote: Windows, Mac, Linux. A separate license must be purchased for each operating system; For example, if you have both a Mac and a Windows computer you will be required to purchase 2 licenses	A single-user license allows you to install SPSS Statistics on up to two computers, if those computers are only used by the same person.	No	No	No
Academic Authorized User	\$800/Yr	Approximately \$900 per Named Individual User Estimate 20% of license cost per license per named user approximately \$360 each	Specific Named Individual user accessing the product in any manner. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.	Use of the Program is restricted to classroom teaching and non-commercial academic research ("Campus Use") , <u>Non-commercial academic research means research by degree seeking students and faculty members</u> where (i) the results of such research are not intended primarily for the benefit of a third party; (ii) such results are made available to anyone without restriction on use, copying or further distribution; and (iii) any copy of any such result is furnished for no more than the cost of reproduction and shipping. Any other use including but not limited to university administration and operations is strictly prohibited.	When ordering state the operating system you use so that you will receive the proper quote: Windows, Mac, Linux. A separate license must be purchased for each operating system; For example, if you have both a Mac and a Windows computer you will be required to purchase 2 licenses	The Program may be installed on any number of computers or servers and each The named authorized User may have simultaneous access to any number of instances of the Program at one time.	Yes	No	Yes if you pay for a license and document them as a named user
Limited User Network Concurrent License	Approximately \$2,250 for SPSS Base License Modules: Advanced and Regression \$1,249 each	N/A	For concurrent use, X number of concurrent copies are installed on the network so x number of people can access the software at one given time.	This license is necessary for Lab and shared system settings. The department is required to have a dedicated server and software administrator available.	Before end users install IBM® SPSS® Statistics on their desktop computers, the lab manager must install the network license manager. The platform on which the network license manager is running does not have to match the platform on which the client is running. For example, a Linux license manager can serve up licenses for Windows clients. You administer the license manager using the license manager tools, which are available only for Windows. You need at least one Windows machine on which to install the license manager tools.	The license manager will deny access to any session that is more than the number of licensed keys. This is set up by the lab manager. More information on the set up can be found here ftp://public.dhe.ibm.com/software/analytics/spss/documentation/statistics/20.0/en/client/InstallationDocuments/Linux/Network_License_Administrators_Guide.pdf	Yes	Yes	Yes
