Program description

The Doctor of Nursing Practice (DNP) is the terminal degree for nurses in clinical practice. It is a 38-credit, post-master’s program intended to prepare nurse leaders for clinical practice.

Registered nurses who possess a DNP degree are prepared to assume clinical and leadership roles in both academic and practice settings. Knowledge acquisition in the DNP program includes the ability to analyze organizational and clinical systems, critique evidence to support clinical practice and improve patient outcomes, and develop practice guidelines to enhance patient safety.

Doctor of Nursing Practice program objectives

Building on the foundation of the master’s program, the DNP program will prepare the student for the highest level of clinical nursing practice. The DNP graduate will:

1. Integrate the science and theory of nursing practice with scientific and theoretical knowledge from other disciplines to improve nursing practice and patient outcomes.
2. Integrate knowledge of effective communication and leadership skills based on professional standards to work as an effective member of an inter-professional team in the provision of safe, high quality, patient-centered care.
3. Demonstrate the appropriate and ethical use of information technology and research methods to improve practice and the practice environment.

Application terms and deadlines

Applicants are admitted for the fall semester only. Before an applicant’s file can be reviewed for full program admission, all application documents must be received in Graduate Admissions by the semester deadlines listed below.

- July 15, for the Fall semester. Exceptional applicants may be considered after the deadline on a space available basis.
• International student deadline: May 1, for the Fall semester

Application requirements

To be considered for graduate admission, applicants must submit all Graduate Application Requirements and any additional department requirements by the published application deadlines:

1. **Graduate Application Requirements**

2. **Additional department application requirements**
   - Completion of a master’s degree in nursing in a clinical area (includes nursing administration but not nursing education) from an institution accredited by the National League for Nursing Accrediting Commission or the Commission on Collegiate Nursing Education with a graduate cumulative grade point average of 3.0 or above. Must submit official transcript with master’s degree posted.
   - Proof of current certification in their specialty area.
   - Applicants who have a master’s degree in nursing education can apply to the DNP program, but will first have to complete the academic requirements of a post-master’s certificate in an advanced practice specialty, and pass the respective certification exam.
   - **Proof of Practicum Experience**
     - DNP applicants must provide evidence of the number of clinical practicum hours they completed in their master’s educational programs. Students may receive credit for up to 640 clock hours of practicum accrued in their master’s program (you may not count unsupervised post-graduate clinical practice). Clinical practicum hours are validated individually for each applicant.
     - DNP applicants must complete and submit the [Supplemental Application-Doctor of Nursing Practice Program](#) form to provide Validation of Supervised Clinical Practice Hours.
   - Copy of unrestricted license to practice as a Registered Nurse in the United States or its territories
   - **Requirements for recommendations:**
     - Both recommendations must be from professionals and must include at least one from an advanced practice nursing colleague familiar with the applicant.
     - Written professional statement of 500 to 1,000 words. The professional statement should focus on the applicant’s professional experiences as an advanced practice nurse, how the DNP will enhance the applicant’s professional development, and the applicant’s career goals following completion of the program. The professional
statement will be evaluated on many areas, including content and appropriate use of grammar, spelling, punctuation, etc. The professional statement should be prepared in size 12 Times New Roman font.

- Individual interview with the School of Nursing’s Director of Graduate Programs.

Admission review and assessment

Admission to graduate study at Oakland University is selective. In making admission recommendations to Graduate Study and Lifelong Learning, each department assesses the potential of applicants for success in the program by examining their undergraduate and graduate records, professional statement, letters of recommendation, telephone interview, and any other admission requirements established by the academic department.

Degree requirements

The Doctor of Nursing Practice degree requires Registered Nurses who graduated with a clinical focus in their master’s programs to complete a minimum of 38 credits, depending on prior didactic content and clinical experiences taken at the master’s level. All DNP students must satisfy a minimum of 1000 supervised clock hours of practicum experience to demonstrate attainment of the doctoral level competencies. Students may receive credit for up to 640 clock hours from their master’s educational program; each applicant’s supervised clock hours of practicum experiences from their master’s program are assessed through a written validation form found in the supplemental application. Registered nurses without a clinical focus in their master’s degree must complete the necessary coursework to obtain a post-master’s certificate in a clinical area, and pass their respective certification exam, in addition to completing the 38 credits of DNP coursework.

All DNP students must complete a minimum of 38 credits of required coursework. In the DNP program, graduate credit will not be awarded for courses in which a grade less than 3.0 is earned. All numerical grades earned are used in computing a student’s grade point average.

Course requirements

a. Foundation courses (12 credits)

- NRS 8211 - Advanced Nursing Theory (3 credits)
• NRS 8221 - Health Care Policy (3 credits)
• NRS 8231 – Organizational and Systems Leadership (3 credits)
• NRS 8241 - Nursing and Healthcare Informatics Leadership (3 credits)

b. Clinical core (4-7 credits)

• NRS 8455 – Intraprofessional and Interprofessional Collaboration (2 credits)
• NRS 8965 - Clinical Immersion Practicum (2-5 credits)
• (NRS 8965 is the clinical immersion course with a credit-to-practice hour ratio of 1:70 that can be taken across a number of semesters. Additional NRS 842 credits may be required depending on the number of supervised hours of practicum experiences acquired in the student’s Master’s program. DNP students can register for 1 to 5 credits per semester of NRS 8965.)

c. Research (18 credits)

The purpose of the research sequence is to prepare DNP students to evaluate current research, develop a research proposal, carry out the research process, and prepare a final report that represents the outcomes of the research effort. The American Association of Colleges of Nursing, The Essentials of Doctoral Education for Advanced Nursing Practice (2006), the DNP Student Handbook and the policies of Oakland University Graduate Study and Lifelong Learning will be used as guides for what constitutes appropriate content and formatting for the final project.

DNP students must identify faculty who will serve as DNP project team members (one faculty chair and one or more members) on their DNP project to supervise the student’s progress in completing the project, ensuring that all human investigation requirements are met. It is permissible for students to work in pairs (no more than two students) on the final project, with permission of the DNP project team members. The School of Nursing Doctor of Nursing Practice Student Handbook provides information and policies related to the project.

• NRS 5302 - Statistics in Advanced Nursing Practice (3 credits)
• NRS 8671 - Advanced Research Methods (4 credits)
• NRS 8681 – Clinical Prevention and Population Health (3 credits)
• NRS 8998 - DNP Project (8 credits)

d. Elective (3-4 credits)

The student is required to identify a 3-4 credit elective that supports his/her area of interest. The elective must be a 5000 level graduate course or higher and must be approved by the Graduate Program Director.
Satisfactory academic progress

Satisfactory Academic Progress (SAP) is the term used to denote a student’s successful completion of coursework toward a certificate or degree. Federal regulations require the Office of Financial Aid to monitor Satisfactory Academic Progress for all financial aid recipients each semester.

Students who fall behind in their coursework, or fail to achieve minimum standards for grade point average and completion of classes, may lose their eligibility for all types of federal, state and university aid. Contact the Office of Financial Aid for additional details.

Good academic standing

All graduate students are expected to remain in good academic standing throughout the entire course of their graduate program.

To be in good academic standing, a graduate student must make satisfactory progress toward fulfilling degree requirements, including the completion of critical degree milestones as set forth by the academic program. The student must also maintain a minimum semester and overall GPA of 3.0.

Good academic standing is a requirement for:

- Holding a Graduate Assistantship
- Receiving a fellowship or scholarship
- Advancing to candidacy for a graduate degree
- Going on a leave of absence
- Obtaining a graduate certificate or degree from Oakland University.

Additionally, graduate students must meet all department academic standards which may be more stringent than the minimum set forth by the University.

*School of Nursing requirements:* Students are required to follow university policies and procedures for graduate students, as described in the Oakland University Graduate Catalog. In addition to the university requirements, specific School of Nursing policies and procedures are outlined in the *School of Nursing Doctor of Nursing Practice Student Handbook.*
Students are expected to earn a grade of 3.0 or above in each course in the DNP program. In courses graded Satisfactory/ Unsatisfactory (S/U), students are expected to earn a course grade of satisfactory.

Students who are not making satisfactory progress in the program may be placed on probation with conditions imposed for retention in the program or may be recommended for dismissal from the program.

Graduate students who are not in good academic standing for any reason are subject to probation and/or dismissal from further graduate study.

**Related program information**

**Advising**

Students are responsible for requirements and policies stated in the *School of Nursing Doctor of Nursing Practice Student Handbook* and each course syllabus. Every student admitted to the DNP program is assigned to an academic adviser who is available to assist with the interpretation and implementation of relevant policies and procedures.

**Continuous enrollment**

The continuous enrollment policy for doctoral students requires continuous registration of graduate students for at least 1 credit each semester in the academic year to maintain an active graduate student status. This includes semesters in which the comprehensive, preliminary or qualifying examination is taken, defense, and each subsequent term (fall and winter) until the degree requirements are met and the dissertation or project is submitted to Graduate Study and Lifelong Learning.

Students are required to submit a leave of absence form if extenuating circumstances arise where the student has to take a semester off. Failure to submit this form may result in a loss of admission status.

Some agency and graduate assistantship eligibility may have course-load requirements that exceed the minimum registration requirements of the Continuous Enrollment Policy (e.g., Veterans Affairs, Immigration and Naturalization for international students, and federal financial aid programs). Therefore, it is the student’s responsibility to register for the appropriate number of credits that are required for funding eligibility and/or compliance as outlined by specific agency regulations under which they are governed.
